

Thank you for your interest in

JCS Pine Hills

Home Study Program

Julian Charter School has been working with families for 25 years to create personalized programs that meet the unique needs of every student. Here are just a few of our Home Study Benefits & Resources:

Educational Overview

We know that all students learn differently. Students in grades TK-12 and their parents will build a personalized learning plan, guided by their caring and credentialed Educational Facilitator (EF). As a team you will be able to choose the curriculum that best fits your student(s) needs using an array of resources and services that we have available.

Curricular Resources & Services

Students in grades TK-12 can check up to 50 items out at a time from our fully stocked Resource Center located in Temecula. In addition to textbooks we have educational games, hands on manipulatives, lab kits, microscopes, literature novels, and more. Your plan might also include lessons with one of our EEP (Educational Enrichment Partners). Your EF will review the types of EEP options with your family, as it aligns to your student's educational goals. Options might include: dance, athletics, music, or tutoring.

Free events & field trip opportunities

JCS Pine Hills offers a variety of field trips every semester, which are included in the student's enrollment. Parent chaperones and non-JCS siblings can pay to attend the field trips, usually at reduced prices. We also offer monthly art enrichments, and JCS community family events such as park days, dances, and more.

Parent & Student Support

As a parent-teacher or student, you will always have support here at JCS. We have a unique INSITE program to support High School students with credentialed and exceptional specialists. We have math and reading programs, online resources, in-house tutoring, our Learning Center enrichment for TK-8th grade students, and attentive educational facilitators that will walk you through the steps you need to be successful with home study.
